Sérgio Salles

Data Analyst | Business Intelligence | SQL, Power BI, Python & Excel

Campos dos Goytacazes, RJ, Brazil | Open to remote work | safsalles@hotmail.com | linkedin.com/in/safsalles | github.com/safsalles | lattes.cnpq.br/1931669740915241

Professional Summary

Data Analyst with 10+ years in wholesale retail and distribution, specializing in Business Intelligence (BI), SQL (Oracle and Google BigQuery), Power BI (DAX and Power Query), Python (pandas, Selenium and smtplib) and advanced Excel. Turned data into decisions for Pricing, Supply, Commercial and Controllership in a group with over R$ 1 billion in revenue and 20,000+ active SKUs. Results: +1.2 p.p. in group gross margin, 50% reduction in group sales stockouts (15 p.p. drop) and 90%+ reduction in operational pricing time. Master's in Applied Systems in Engineering and Management (Operations Research), MBA in Finance and Controllership, university Business Intelligence instructor and Google Data Analytics certified.

Skills

Data & BI: Business Intelligence (BI), SQL (Oracle, Google BigQuery), Power BI, DAX, Power Query, ETL, Python (pandas, Selenium, Playwright, automation), advanced Excel (pivot tables, VBA, scenario simulation), Google Sheets, Tableau, R, Matlab, data modeling, dashboards, KPIs

Data Analysis: exploratory data analysis, variance analysis, segmentation (ABC analysis, clustering), scenario simulation, data reconciliation and auditing, Operations Research, data storytelling

Business: Pricing, margin management, market intelligence, Supply Chain, replenishment, inventory management, stockouts, Open to Buy, TOTVS Consinco, TOTVS Gemco

Professional Experience

Pricing Manager

Barcelos | Wholesale Retail and Distribution | Campos dos Goytacazes, RJ | Jan 2024 – Oct 2026

- Developed ETL routines in SQL (Oracle and Google BigQuery) and DAX data models for the daily Business Intelligence (BI) reports used by senior management.
- Automated the collection, processing and visualization of competitor price surveys, including external data (Infoprice), using Python, SQL and Power BI.
- Built a Python process (pandas, SQLAlchemy and oracledb) to evaluate new supplier cost tables, generating an automatic recommendation based on competitor data.
- Automated daily email alerts (smtplib) to supervisors about items with critical margin deviations, supporting supplier renegotiation.
- Set margin targets with the Commercial team for 4 channels (Wholesale, Cash-and-Carry, Retail and Premium Retail) and the Telesales, E-commerce and iFood segments.
- Implemented semi-automated base and promotional pricing across channels and configured the TOTVS Consinco ERP (prices, margin targets and rules for sending data to stores).
- Led a team of 9 (5 price researchers, 3 analysts and 1 assistant), developing people and managing daily routines.
- **Results:** +1.2 p.p. in group gross margin; +4.1% in competitiveness (basket value); 90%+ reduction in operational pricing time.

Supply Manager

Barcelos | Wholesale Retail and Distribution | Campos dos Goytacazes, RJ | Apr 2024 – Apr 2026 (concurrent with Pricing Manager role)

- Created the Sales Stockout dashboard and a KPI matrix by supplier, sales, purchasing and logistics; consolidated operational dashboards, eliminating redundancies.
- Built a store imbalance dashboard that enabled the transfer of surplus stock equal to 1% of the mix (~15,000 SKUs).
- Led a team of 5, organized by product category.
- **Results:** 50% reduction in group sales stockouts (15 p.p. drop); department stockouts down from ~0.5% to ~0.2% with automated alerts on items held at the distribution center; 33% reduction in operational time through batch automation, reallocating 1 team member.

Pricing Coordinator

Barcelos | Wholesale Retail and Distribution | Campos dos Goytacazes, RJ | Nov 2020 – Jan 2024

- Modeled data and defined business rules in Power BI to consolidate sales, margin, price and competitive intelligence KPIs.
- Automated the extraction, processing and delivery of daily commercial reports using Python (Selenium), SQL and Power BI, eliminating 1 hour of daily manual work.

- Implemented an automated trade funds management model (SQL, Power Query, Google Sheets and Power BI), with real-time visibility of incentive allocation and expiration.
- Audited data through cross-reconciliation with financial and accounting reports, ensuring integrity for decision-making.
- Led management meetings and executive presentations to the Board of Directors, aligning financial targets, margins and pricing strategy.
- Led a team of 7 (5 price researchers and 2 pricing analysts).

Controllership Analyst

Barcelos | Wholesale Retail and Distribution | Campos dos Goytacazes, RJ | Oct 2018 – Nov 2020

- Built, before Power BI was adopted, a semi-automated Excel reporting system, with files generated daily via SQL, pivot tables and VBA.
- Took part in the transition to Power BI, migrating Excel reports to dashboards (SQL, Power Query and DAX) and standardizing Sales, Purchasing and Supply Chain KPIs.

Higher Education and Technical Instructor

Universidade Candido Mendes – Campos | Campos dos Goytacazes, RJ | Mar 2019 – Present

- Current courses: Business Intelligence (Power BI, Python and SQL), Materials Management, Project Management, Decision-Making Methods, Computer Simulation, Production Management and Quality Tools.

Business Analyst and Consultant

Olyver Consultoria Empresarial | Campos dos Goytacazes, RJ | Jul 2015 – Dec 2016

- Organizational restructuring for 3 retail and distribution clients: process mapping, purchasing routines, KPIs, budgets and income statement tracking.

Projects

Résumé System: Python system that generates PDF résumés in 3 languages and role-specific versions from a single YAML career database, with data validation, automatic number and page checks, version history and automated tests (pytest). Built with AI (Claude Code), from specification to tests.

GitHub Portfolio: Public repository of Data Science and automation projects, organized by project, with READMEs in Portuguese and English, dependencies and, in the analysis projects, automated tests (pytest) and a notebook. The most recent projects are specified before coding and built with AI (Claude Code). github.com/safsalles/portfolio-ds

Radar de Vagas (Job Finder): Python bot (Playwright and public APIs) that searches job postings across 8 sources, classifies and filters them by title, work model and location, scores the match with my skills and emails the new postings every day. Automated tests. github.com/safsalles/portfolio-ds

MEM-GA (memga): Package for the multicriteria method with a genetic algorithm from my master's thesis. Available in Python (PyPI), R and MATLAB, with automated tests and a Zenodo DOI. github.com/safsalles/portfolio-ds

Education

- **Master's in Applied Systems in Engineering and Management (Operations Research)** – Instituto Federal Fluminense (IFF), 2017–2018
- **MBA in Finance and Controllership** – Universidade Candido Mendes, 2016–2017
- **Postgraduate Degree in Management, Design and Marketing** – Instituto Federal Fluminense (IFF), 2016–2017
- **Bachelor's in Production Engineering** – Universidade Candido Mendes, 2009–2015

Courses and Certifications

- Google Data Analytics – Google, 2026
- Python Fundamentals for Data Analysis and Data Science – Data Science Academy, 2024 (72 hours)
- Python, Data Science and Automation – DataTech, 2023 (100 hours)
- Microsoft Power BI for Data Science – Data Science Academy, 2022 (70 hours)

Languages

Portuguese (native) | English (full professional proficiency; EF SET 78/100, C2 Proficient) | Spanish (limited working proficiency)

Publications

Scientific output: 10 journal articles, 21 conference papers, 1 book chapter and 2 extended abstracts. Full list: lattes.cnpq.br/1931669740915241
